PREFACE.

"THE REGISTER OF AUSTRALIAN AND NEW ZEALAND SHIPPING" is published by the Marine Underwriters' Association of Victoria Limited, and has now reached its thirty-fifth year of issue. It is recognised as the only official and trustworthy record of the Steam and Sailing Tonnage of the Australian States, New Zealand, and Fiji, and the work is now looked upon as a necessity to ship owners, ship agents, underwriters, and all who are directly or indirectly interested in the Shipping trade of the Southern Seas.

The rapid increase of late years in the shipping of these States and Colonies has necessitated a continuous enlargement of the Register, and it now contains upwards of double the number of pages it did when first issued, when the price was fixed at fifteen shillings per copy. The publication of such a work is expensive, from the large amount of information given in a small space, and the Committee have decided to charge £1 per copy, which barely covers the cost of the book. For the benefit, however, of subscribers in other States and Colonies, it has been arranged to forward the orders from each in one parcel, and make no additional charge for postage or forwarding.

To give additional value to the Register, a list has been compiled with great care of all Docks and Slips in the above-mentioned States and Colonies, with such particulars regarding them as will serve for a guide to ship masters or owners who may not be aware of what facilities exist in the port their vessel may be bound to for carrying out extensive repairs. For some part of this information we are indebted to Lloyd's Register of British and Foreign Shipping, but we have supplemented the blanks in the particulars given in that book, and now present as complete and accurate a list as possible; any omissions that may be found will be supplied in next issue, and all new docks or slips will be added as they are built.

Page 6 of the Register contains a Comparative Table for the four years 1904-1907 (inclusive), which shows the increase or decrease for each State and Colony and port during the period in question in the number and tonnage of the sailing vessels and steamers there registered. The figures in this Table have been most carefully gone over and checked, and they can therefore be taken as correct, assuming, first, that the materials for them supplied by the Registrars contain no errors. On the following page appears the corresponding information for 1908.

Periodical Supplements of corrections and additions are issued gratis to Members of this Association and kindred Institutions.

The Committee are sensible of the obligation under which they lie to the Collectors of Customs and Registrars of Shipping who have supplied the materials of the Register, and desire to express their thanks to those gentlemen for their courtesy and attention.

WILLIAM FETHERS,
Secretary.

MELBOURNE, SEPTEMBER, 1908.

KEY TO THE REGISTER.

For the convenience of those who may not have access to all the Registers referred to in the last column, the class of those vessels which are included in LLOYD'S REGISTER OF BRITISH AND FOREIGN SHIPPING and BUREAU VERITAS has been printed as given in the Register of the highest reputation. Thus, if classed in Lloyd's, it will be shown as **L100,A1**; the class being printed, for the sake of distinction, in *italics*.

Some misunderstanding having arisen as to what is implied by the dates following the words Mel., Syd., Ad., &c., in the last column of the Register, subscribers are requested to take notice that they are intended to convey *no expression of opinion, favourable or otherwise*, but are given simply to afford Underwriters and others an opportunity of ascertaining where the latest information as to the condition of the vessel in question can be obtained, not more than four years previous to date of issue, this information being given in the Survey Reports recorded at the offices of the Underwriters' Association at the particular port referred to.

The Tonnage and other particulars as stated on each vessel's register has been adhered to, though this does not in every case agree with that given in the books of classification. In many cases also vessels known to be lost are retained in the Register, for the reason that the Registrar has not yet written them off his books, and this Register claims to be a complete record, alphabetically arranged, of the books of the Registrars of the Australian States, New Zealand, Fiji, and New Guinea.

ABBREVIATIONS USED IN THE REGISTER.

FEES.

(1) *Entering for Classification or time—*

For each Ship under 100 tons	...	...	...	...	...	...	£3 0 0
For every additional 100 tons, or part of 100 tons	...	...	...	...	...	...	0 10 0

(2) *Entering for Continuation or Restoration and Registering Repairs—*

For each Ship under 100 tons	...	...	...	...	...	...	£1 0 0
For every additional 100 tons, or part of 100 tons	...	...	...	...	...	...	0 5 0

(3) *Entering for Character in V only—*

For each Ship under 100 tons	...	...	...	...	...	...	£1 0 0
For every additional 100 tons, or part of 100 tons, up to 800 tons...	...	...	...	...	...	...	0 5 0
For every Ship of 900 tons and over	...	...	...	...	...	...	3 0 0

(4) *Entering for Grain Certificate (including Stowage Certificate)—*

For each Ship under 500 tons	...	...	...	...	...	...	£2 2 0
For each Ship over 500 tons ...	...	...	...	...	...	...	3 3 0

(5) *Surveys—*

For surveys of damage and repairs, or for other surveys held at the request of the owners, and for survey for Restoration or Continuation, a charge (in addition to the Fee for entry) will be made according to the nature and extent of the service performed.

(6) *Special Survey during Construction—*

For superintendence during construction, 1s. per ton.

For classification for time, as set forth in Schedule No. 1.

CHARACTERS.

3. The Characters to be assigned to Ships to be as nearly as possible a correct indication of their real and intrinsic qualities, to be in all cases fixed by the Committee after due consideration of the reports of the Surveyors and of such other documents as may be submitted, and to be distinguished as follows :—

FOR PERIODS NOT EXCEEDING FOUR YEARS.

 and 

To consist of Ships fit for the conveyance of dry and perishable goods to and from all parts of the world.

To consist of Ships fit for the conveyance of dry and perishable goods, subject to special attention being paid to dunnage and stowage.

To consist of Ships fit for the conveyance of cargoes not in their nature subject to sea damage.

FOR SINGLE VOYAGES OR FOR SUCCESSIVE VOYAGES, NOT EXTENDING IN THE WHOLE BEYOND A PERIOD OF ONE YEAR.

 and 

To consist of Ships fit for the conveyance of dry and perishable goods to and from all parts of the world.

To consist of Ships fit for the conveyance of dry and perishable goods, subject to special attention being paid to dunnage and stowage.

To consist of Ships fit for the conveyance of cargoes not in their nature subject to sea damage.

GENERAL CONDITIONS.

4. The character  will be granted to Ships of high class only, and will be continued at the discretion of the Committee, subject to triennial survey.
5. The character of Ships classed **A B** and **C** for two, three, and four years will be forfeited unless they be submitted to an intermediate survey within a period of one-half the time originally assigned, the nature and extent of such survey to be determined by the Committee in each case.
6. For the class **V**, Ships registered  at Lloyd's, and all other Ships which, in the opinion of the Committee, are likely to carry their cargoes equally free from sea damage, will, if found on inspection to have been well kept up, and to show no signs of weakness or defect, be granted the character . All other Ships will be assigned a character corresponding with their intrinsic qualities and irrespective of former classification.

STORES AND EQUIPMENT.

7. The Character of stores and equipment will be indicated by the numerals 1 and 2.

SURVEYS.

8. Any owner desirous of having his Ship classed, shall make written application to the Secretary, and pay the requisite fee for entry, and the Committee shall then direct a survey to be made by one or more competent persons, to be appointed by the Committee, one of them to be a Surveyor, the exclusive Officer of the Association.

9. The Ship to be either placed in dry dock or laid on blocks so that the keel may be examined, and the outside planking to be dubbed bright, or scraped from the light waterline upwards including the planksheers and waterways, so as to expose the surface of the plank to view. A listing, four inches wide, to be cut out of the ceiling at each end of the hold on both sides, one-fifth the entire length of the Ship between the keelson and the air course. Bolts, if of iron, not less than four on each side in each range of deck fastenings to be driven out. One treenail to be driven out in every ten feet between the upper edge of the wales and planksheers, and one in every ten feet between the upper edge of the wales and the lightwater mark, and at such other parts of the bottom as the Surveyor may direct, so as to enable a judgment to be formed as to the general state of the treenails, timbers, and of the planking in the treenail holes. The hold to be cleared. All air courses and the limbers to be cleared for the examination of the timbers. The windlass to be unhung, and a portion of the wood linings stripped. A portion of four sheets of metal sheathing on each side to be turned back for the purpose of ascertaining the condition of the oakum and the caulking.

10. Ships having a certificate of character from the Committee of Lloyd's Register, with at the least two years to run, and also Ships newly constructed, may be surveyed afloat, subject to such conditions as the Committee may impose; but in no such case will the character assigned extend beyond two years. Other Ships, if recently caulked and metalled, may also be permitted a special survey in manner directed by the Committee; but in no such case will the character assigned extend beyond two years.

11. Surveys for character in **V** may be made afloat, subject to such conditions as the Committee may impose.

12. All Ships are required to have their masts, spars and rigging, rudder, pumps, windlass or capstan, scuppers, and hawse pipes, in good order, and sails in sufficient number and in good condition.

13. Every Ship is to be provided with anchors and cables of approved quality, in number and length as required by the regulations of Lloyd's.

14. The length and condition of the chain cables are to be ascertained by removal from the lockers on every special survey for classification.

15. The Surveyors of the Association are at all times to have free access to examine Ships holding a certificate from the Association; and in case of defects reported to the Committee not being made good if so required, the classification of the Ship shall be reduced or forfeited as the Committee may determine.

RULES AND REGULATIONS FOR RIVERINE TRAFFIC.

Approved of and adopted by the Underwriters' Associations in Melbourne, Sydney, and Adelaide.

1. All steamers and barges must be submitted for survey to the representative of one of the above Associations at least once in each year.

2. In every case where a steamer or barge has sustained damage to the hull, notice must at once be sent to the Association whose certificate she holds, together with the necessary fee, and such certificate shall thenceforward be suspended until she is efficiently repaired. Immediately on her arrival at the nearest convenient spot, the cargo must be discharged, in whole or part, as may be necessary, and if efficient repairs cannot be effected there, the vessel must be taken, in ballast, to the nearest available place, and placed on the slip, and the requisite repairs carried out to the satisfaction of the surveyor to either Association.

All craft must have their bottoms sighted once every twelve months, unless exempted by the Association issuing the certificate on the report of its surveyor.

3. In the event of a steamer or barge being detained in the upper rivers, from lowness of water or other cause, which will prevent it being at Bourke, Echuca, Morgan, Mannum, or Goolwa at the date of expiry of its certificate, notice of the same must be at once forwarded to the Association by which such certificate was issued, stating the cause of the detention, enclosing a fee of £2, and requesting an extension of the certificate until the completion of the intended voyage. On her return to either of these ports, she must be submitted for survey in the usual manner, when a twelve months' certificate (dating back from the date of the expiry of the previous certificate) will be issued if the surveyor's report be satisfactory.

In no case shall a craft be granted a certificate when objection has been made by a surveyor of either Association until such objection has been removed.

The Association objecting to immediately notify the other Associations.

4. The conditions under which certificates will be granted to steamers and barges are as follow :—

- (a.) Certificates will be issued for a period not exceeding twelve (12) months.
- (b.) All steamers shall employ certificated masters and engineers when trading, otherwise the certificate of class to be invalid.
- (c.) Plans of all intended new steamers and barges to be submitted to the surveyor for approval before building.
- (d.) The fees payable for certificates are as follow :—

NEW CERTIFICATES.

For each craft under 100 tons	...	...	...	...	...	...	£3
For every additional 100 tons, or part of 100 tons	...	...	...	...	...	...	10s.

RENEWALS.

For every craft, irrespective of tonnage (if applied for within one month of expiry of certificate) ...	...	£2
If not renewed or extended within one month from date of expiry of previous certificate	...	£3

REPAIRS.

For survey of repairs (ordinary)	...	...	...	...	...	...	£1
For extensive repairs, according to time.							

(e.) *Freeboard.*—The following scale of Freeboard must be observed :—

Up to eighty (80) tons register, a minimum of fifteen (15) inches.

For every further twenty (20) tons, one (1) inch additional.

For vessels proceeding below Wellington the freeboard shall not be less than three (3) inches for every foot (register) depth of hold, with a minimum of eighteen (18) inches in any case, and they must be provided with combings of at least six (6) inches high.

(f.) *Wool Stowage*.—The height of stowage from deck or deck beams shall not exceed—

- (1.) In steamers, two-thirds ($\frac{2}{3}$) of beam.
- (2.) In round bilge barges, one-half ($\frac{1}{2}$) of beam.
- (3.) In square chime barges, one-half ($\frac{1}{2}$) of beam, such beam to be measured at one-third ($\frac{1}{3}$) of depth of hold from the bottom, and from the inside of the frames.

Each certificate shall have clearly marked upon it the number of tiers of bales that may be carried above the deck beams. The outside bales of the tier, next above the deck or deck beams, shall rest on the combings, but a clear space must be left of not less than twelve (12) inches from the wool lashings and tarpaulin stops to the side of the hull or outside of the guards (if any), so as to form a gangway. Certificates shall be issued subject to one of the following loading clauses, to be decided by the Surveyor:—

- (1.) Each tier of bales above the deck or deck beams shall recede *one* foot on each side from the tier next below.
- (2.) Each tier of bales above the deck or deck beams shall recede *two* feet on each side from the tier next below.

Rider-tier shall mean a single bale stowed lengthways fore and aft, and not to exceed in length the deck load.

Greasy wool shall not be stowed above scoured wool, nor dumped wool above undumped wool.

(g.) *Towage*.—Steamers under twenty (20) horse power will not be allowed to tow more than one (1) barge, unless specially allowed by their certificate. The maximum tonnage of the barge or barges that may be towed will be specified in the certificate granted to each steamer. A tow line and all necessary ropes to be supplied to the satisfaction of the Surveyor. All steamers must hold certificates from one of the above Associations.

(h.) *Bulkheads*.—

- (1.) All steamers shall be fitted with watertight iron bulkheads between the boiler and the cargo carrying space of such construction as to prevent the communication of fire with the cargo.

(2.) Steamers and barges to be fitted with watertight bulkheads of not less than $\frac{3}{8}$ inch iron, and no limber holes; one bulkhead to be fifteen feet from forward, one twenty feet from aft, and one amidships, except in cases where the boiler bulkheads in steamers, as per preceding clause, render it unnecessary—all to be supported with vertical angle irons on one side, and diagonals on the other, to the satisfaction of the Surveyor.

(3.) Should any of the Surveyors of either Association deem it necessary to have an extra bulkhead in either steamer or barge same to be fitted to the satisfaction of the Surveyor.

(i.) *Pumps*.—One Pump to be kept fitted in each compartment in a fixed case, to the satisfaction of the Surveyor.

(k.) *Ridgepoles*.—All ridgepoles and uprights to be kept fixed when wool or perishable cargo is on board, and sufficient tarpaulins provided and secured, so as to protect the cargo from damage by sparks or water.

(l.) Efficient spark-catchers shall be kept fixed on the top of funnels of steamers when required by the Surveyor.

(m.) *Tops of Deck-houses*.—No deck-houses shall be constructed or covered with canvas or similar substance.

(n.) *Planking*.—The outside planking (hardwood) in the bottom and bilges must not be allowed to get below two inches in thickness.

In no case will other than approved hardwood be accepted for classification.

ACETYLENE GAS AND CALCIC CARBIDE.

To apply to all Steamers, Sailers, Hulks, ^{and}_{or} Barges.

The use for lighting purposes of Acetylene Gas, or the deposit of Calcid Carbide, can only be permitted when the Owner has signed an undertaking in accordance with the following Rules, and then the Certificate may be endorsed as per Form "B."

FORM "A."

In the consideration of the use of Acetylene Gas for lighting being permitted ^I_{we} undertake as a warranty—

- (1) That no liquid Acetylene Gas, or Acetylene in a compressed form, shall be deposited on any portion of the vessels above referred to.
- (2) That the Calcid Carbide shall be in securely closed metallic receptacles containing not more than One Pound in each, and shall be stored in an iron tank to be painted RED, with the words CALCIC CARBIDE thereon in bold white letters. Such tank shall not be stored elsewhere than on or above deck, placed where there is abundant ventilation.
- (3) That the Generator shall be placed in the open air on an upper deck or roof of deckhouse, or if necessary to protect it from the weather, in a special small deckhouse so constructed as to allow of abundant and thorough ventilation.
- (4) That the Generator shall only be filled during daylight. That no matches or artificial light or heat be used where the Generator is fixed or the Calcid Carbide stored.
- (5) That when sufficient material for charging the Generator has been taken from the Calcid Carbide receptacle, the cover thereof shall be securely replaced.
- (6) That a Stop Cock, securely placed, be fixed in the gas main so that the gas may be shut off at any moment.
- (7) That no pipes, fittings, burners, or accessories of copper or silver be used.

- (8) That permission to use the Acetylene Gas light is not to imply any liability for damage done by explosion apart from the engendering thereby of fire.
- (9) That every Generator when fixed, and before use, shall be inspected and passed by a competent man approved by this Association, whose Certificate shall be produced, and in the event of any alteration or the introduction before being brought into use of any type of Generator other than that so inspected and passed, the same shall be approved by this Association's Surveyor and his Certificate produced to the effect that danger has not been increased by the alteration.
